Thats actually a good review on HF If you use Heli-X and it feels right, then the most important thing is how many hours you spend learning the basics.. DownloadI think simulators are similar to helicopters When you are learning the fundamental stick movements, its not as critical compared to when you are doing super advanced and quick maneuvers. So Heli-X should be fine for orientations and it may even be a great sim! I might see if there is a demo so i can try it.. I compare it to training Maltego 3 1 serial key MediaTrain on your sim - use it to learn your next objective - refine what you know and create a training routine (ie 10 mins going over what you know, 10 mins learning your next trick and 10 mins free style with tricks you know).. There are lots of tutorial videos around and i encourage you to try the heligods tutorials for a different perspective..
